Re: Right of Entry for Mine Reclamation, Drum Mine Project, Jumbo Mining Company & Western States Mineral Corporation, M/027/007, Millard & Juab Counties, Utah

Dear Mr. Knight:

As you are aware, the Division of Oil Gas and Mining's Minerals Regulatory Program, using Western States Minerals Corporation (WSMC) as its construction contractor, is preparing to reclaim the unreclaimed Drum Mine located in Millard and Juab Counties, Utah (see attached map for locations). The purpose of this reclamation is to reduce the public health and safety hazards associated with this inactive mine. This project is funded by a portion of the Drum Mine reclamation bond that was forfeited when Jumbo Mining Company (JMC) declared bankruptcy.

Ownership research shows that Ibex Gold Mining Trust (IGMT) is the owner of a small portion of the mine disturbance known as the Alto Pit. It is located in Juab County approximately two miles to the north of the main facilities area. Reclamation at the Alto Pit will consist of regrading the area to blend with the surrounding topography to the extent practicable. A portion of the high wall will remain, as removal of this feature will result in further disturbance. Construction related disturbance will be reseeded. It is my understanding that you represent, and are partial owner of IGMT. The Division requests IGMT's consent to allow WSMC to perform this reclamation.

Enclosed are two copies of a Right of Entry Agreement. The location of the Alto Pit is indicated on this agreement and is also shown on the enclosed map. If you concur with this proposal, please sign and date both copies. Please return one copy of the Agreement to me at the above address and keep the other copy for your records.
